17th IEEE International
Requirements Engineering
Conference
31 August – 4 September 2009
Atlanta, Georgia, USA

**RE'09 Posters and Research Demonstrations Co-chairs**

Andrea Zisman, UK
Mehrdad Sabetzadeh, UK

**Programme Committee**

Mikio Aoyama, Japan
Luciano Baresi, Italy
Marsha Chechik, Canada
Paul Gruenbacher, Austria
Robert Hall, USA
Jane Hayes, USA
Christos Kloukinas, UK
Julio Leite, Brazil

**Important Dates**

***Deadline for submission***
**11 May 2009**

***Notification of authors***
**5 June 2009**

***Camera-ready abstract due***
**15 June 2009**

**Page Limit**
**2 pages**

***For more information contact***

# Call for Submissions
# RE'09 Posters and Research Demonstrations

The 17th IEEE International Requirements Engineering Conference (RE'09) invites submissions of high-quality posters and research demonstrations. The Posters and Research Demonstrations programme complements the main conference programme by offering an opportunity for researchers and practitioners to present late-breaking or as-yet incomplete research results, or significant work-in-progress in Requirements Engineering. We particularly encourage presentations of posters and research demonstrations that are augmented with videos or DVDs.

## Review Process

Posters and research demonstrations will be reviewed based on their quality, relevance, originality, significance, and soundness. The proposals should describe the main technical contributions of the work and not how it will be physically presented as a poster or research demonstration. Commercial products will not be accepted as research demonstrations (demonstrations of commercial products should be directed to the Demo track). Research demonstrations are not intended to be a forum for commercialization and marketing of a product.

## Submission Process

Poster authors are invited to submit original proposals describing the work and the results that have not been submitted for review or published elsewhere. The proposal may include a small number of references, or even a figure or two. Research demonstration proposals should describe tools, techniques or methods of Requirements Engineering, including references, contributions, and how the work relates to other industrial or research effort. Both poster and research demonstration proposals must be written in English, conform to the IEEE CS Press Proceedings format (see http://www.computer.org/portal/site/cscps/ for instructions and templates), and should not exceed 2 pages. It is advisable to include an email address and a URL leading to more information about the work. Submissions of posters and research demonstrations are via EasyChair. Please use the following web site http://www.easychair.org/conferences/?conf=re09posters to make your submission.

## Accepted Posters and Research Demonstrations

Accepted posters and research demonstrations will be given space in an exhibit area during the conference. Authors will have designated hours during which they are expected to be at their assigned space to present their work. Each accepted poster and research demonstration will be published in the RE'09 proceedings as a 2-page extended abstract. At least one author should register for the conference.
